

without publicly presenting justification or evidence of wrongdoing;

Whereas even Paul Whelan's Federal Security Service-appointed lawyer, Vladimir Zhrebenkov, said on May 24, 2019, "[The Federal Security Service] always roll[s] out what they have, but in this case, we've seen nothing concrete against Whelan in five months. That means there is nothing.";

Whereas the then United States Ambassador to the Russian Federation, Jon Huntsman, responded on April 12, 2019, to a question about the detention of Paul Whelan, "If the Russians have evidence, they should bring it forward. We have seen nothing. If there was a case, I think the evidence would have been brought forward by now.";

Whereas then Secretary of State Mike Pompeo met with Russian Foreign Minister Sergey Lavrov on May 14, 2019, and urged him to ensure United States citizens are not unjustly held abroad;

Whereas the Kremlin has refused Paul Whelan full access to his lawyer and the so-called evidence against him, and any evidence he has seen is in Russian, a language Paul does not read or speak;

Whereas Lefortovo pre-trial detention facility and the Ministry of Foreign Affairs refused to provide medical treatment for Paul Whelan's medical condition, despite being aware of its worsening state, resulting in emergency surgery on May 29, 2020;

Whereas Paul Whelan was wrongfully convicted on June 15, 2020, and sentenced to 16 years in a Russian labor camp by a three-judge panel, in a trial witnessed by United States Ambassador John Sullivan, who referred to it as "a mockery of justice" due to the denial of a fair trial and the exclusion of defense witnesses;

Whereas, in August 2020, on an unknown day because he was moved secretly, Paul Whelan was transferred to camp IK-17, a penal labor camp in Mordovia, where he is forced to work 6 days a week in a garment factory;

Whereas Ambassador John Sullivan, while visiting Paul Whelan at the labor camp in Mordovia, stated that "Russian authorities. . . have never shown the world evidence of his guilt," and reiterated his call that the Russian authorities correct this injustice and release Mr. Whelan; and

Whereas Secretary of State Antony Blinken spoke with Russian Foreign Minister Sergei Lavrov on February 4, 2021, and urged him to release Americans detained in Russia, including Paul Whelan and Trevor Reed, so that they are able to return home to their families in the United States: Now, therefore, be it

Resolved, That the Senate—

(1) implores the Government of the Russian Federation present credible evidence on the allegations against Paul Whelan or immediately release him from imprisonment;

(2) implores the Government of the Russian Federation comply with its international treaty obligations and provide unrestricted consular access to Paul Whelan while he remains imprisoned in Russia;

(3) calls on the Government of the Russian Federation to provide Paul Whelan and all other political prisoners their constitutionally afforded due process rights and universally recognized human rights; and

(4) expresses sympathy to the family of Paul Whelan for this travesty to justice and personal hardship, and expresses hope that their ordeal can soon be brought to a just end.

SENATE RESOLUTION 166—RECOGNIZING THE DUTY OF THE FEDERAL GOVERNMENT TO CREATE A GREEN NEW DEAL

Mr. MARKEY (for himself, Mr. WYDEN, Ms. WARREN, Mr. SANDERS, Mr. PADILLA, Mr. VAN HOLLEN, Mr. BLUMENTHAL, Mrs. GILLIBRAND, Mr. MERKLEY, Mr. MURPHY, Ms. HIRONO, Ms. KLOBUCHAR, and Mr. BOOKER) submitted the following resolution; which was referred to the Committee on Environment and Public Works:

S. RES. 166

Whereas the October 2018 report entitled "Special Report on Global Warming of 1.5 by the Intergovernmental Panel on Climate Change and the November 2018 Fourth National Climate Assessment report found that—

(1) human activity is the dominant cause of observed climate change over the past century;

(2) a changing climate is causing sea levels to rise and an increase in wildfires, severe storms, droughts, and other extreme weather events that threaten human life, healthy communities, and critical infrastructure;

(3) global warming at or greater than 2 degrees Celsius beyond preindustrialized levels will cause—

(A) mass migration from the regions most affected by climate change;

(B) more than \$500,000,000,000 in lost annual economic output in the United States by the year 2100;

(C) wildfires that, by 2050, will annually burn at least twice as much forest area in the western United States than was typically burned by wildfires in the years preceding 2019;

(D) a loss of more than 99 percent of all coral reefs on Earth;

(E) more than 350,000,000 more people to be exposed globally to deadly heat stress by 2050; and

(F) a risk of damage to \$1,000,000,000,000 of public infrastructure and coastal real estate in the United States; and

(4) global temperatures must be kept less than 1.5 degrees Celsius above preindustrialized levels to avoid the most severe impacts of a changing climate, which will require—

(A) global reductions in greenhouse gas emissions from human sources of 40 to 60 percent from 2010 levels by 2030; and

(B) net-zero global emissions by 2050;

Whereas, because the United States has historically been responsible for a disproportionate amount of greenhouse gas emissions, having emitted 20 percent of global greenhouse gas emissions through 2014, and has a high technological capacity, the United States must take a leading role in reducing emissions through economic transformation;

Whereas the United States is currently experiencing several related crises, with—

(1) life expectancy declining while basic needs, such as clean air, clean water, healthy food, and adequate health care, housing, transportation, and education, are inaccessible to a significant portion of the United States population;

(2) a 4-decade trend of wage stagnation, deindustrialization, and antilabor policies that has led to—

(A) hourly wages overall stagnating since the 1970s despite increased worker productivity;

(B) the third-worst level of socioeconomic mobility in the developed world before the Great Recession;

(C) the erosion of the earning and bargaining power of workers in the United States; and

(D) inadequate resources for public sector workers to confront the challenges of climate change at the Federal, State, and local level; and

(3) the greatest income inequality since the 1920s, with—

(A) the top 1 percent of earners accruing 91 percent of gains in the first few years of economic recovery after the Great Recession;

(B) a large racial wealth divide amounting to a difference of 20 times more wealth between the average White family and the average Black family; and

(C) a gender earnings gap that results in women earning approximately 80 percent as much as men, at the median;

Whereas climate change, pollution, and environmental destruction have exacerbated systemic racial, regional, social, environmental, and economic injustices (referred to in this preamble as "systemic injustices") by disproportionately affecting indigenous peoples, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low-income workers, women, the elderly, the unhoused, people with disabilities, and youth (referred to in this preamble as "frontline and vulnerable communities");

Whereas, climate change constitutes a direct threat to the national security of the United States—

(1) by impacting the economic, environmental, and social stability of countries and communities around the world; and

(2) by acting as a threat multiplier;

Whereas the Federal Government-led mobilizations during World War II and the New Deal created the greatest middle class that the United States has ever seen, but many members of frontline and vulnerable communities were excluded from many of the economic and societal benefits of those mobilizations; and

Whereas the Senate recognizes that a new national, social, industrial, and economic mobilization on a scale not seen since World War II and the New Deal era is a historic opportunity—

(1) to create millions of good, high-wage jobs in the United States;

(2) to provide unprecedented levels of prosperity and economic security for all people of the United States; and

(3) to counteract systemic injustices: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) it is the duty of the Federal Government to create a Green New Deal—

(A) to achieve the greenhouse gas and toxic emissions reductions needed to stay under 1.5 degrees Celsius of warming, through a fair and just transition for all communities and workers;

(B) to create millions of good, high-wage union jobs and encourage collective bargaining agreements to ensure prosperity and economic security for all people of the United States;

(C) to invest in the infrastructure and industry of the United States to sustainably meet the challenges of the 21st century;

(D) to secure for all people of the United States for generations to come—

(i) clean air and water;

(ii) climate and community resiliency;

(iii) healthy food;

(iv) access to nature; and

(v) a sustainable environment; and

(E) to promote justice and equity by stopping current, preventing future, and repairing historic oppression of indigenous peoples, communities of color, migrant communities, deindustrialized communities, depopulated rural communities, the poor, low-income workers, women, the elderly, the unhoused,

people with disabilities, and youth (referred to in this resolution as “frontline and vulnerable communities”);

(2) the goals described in subparagraphs (A) through (E) of paragraph (1) (referred to in this resolution as the “Green New Deal goals”) should be accomplished through a 10-year national mobilization (referred to in this resolution as the “Green New Deal mobilization”) that will require—

(A) building resiliency against climate change-related disasters, such as extreme weather, including by leveraging funding and providing investments for community-defined projects and strategies;

(B) repairing and upgrading the infrastructure in the United States, including—

(i) by eliminating pollution and greenhouse gas emissions as much as technologically feasible;

(ii) by guaranteeing universal access to clean water;

(iii) by reducing the risks posed by climate impacts; and

(iv) by ensuring that any infrastructure bill considered by Congress addresses climate change;

(C) meeting 100 percent of the power demand in the United States through clean, renewable, and zero-emission energy sources, including—

(i) by dramatically expanding and upgrading renewable power sources; and

(ii) by deploying new capacity;

(D) building or upgrading to energy-efficient, distributed, and “smart” power grids and ensuring affordable access to electricity;

(E) upgrading all existing buildings in the United States and building new buildings to achieve maximum energy efficiency, water efficiency, safety, affordability, comfort, and durability, including through electrification;

(F) spurring massive growth in clean manufacturing in the United States and removing pollution and greenhouse gas emissions from manufacturing and industry as much as is technologically feasible, including by expanding renewable energy manufacturing and investing in existing manufacturing and industry;

(G) working collaboratively with farmers and ranchers in the United States to remove pollution and greenhouse gas emissions from the agricultural sector as much as is technologically feasible, including—

(i) by supporting family farming;

(ii) by investing in sustainable farming and land use practices that increase soil health; and

(iii) by building a more sustainable food system that ensures universal access to healthy food;

(H) overhauling transportation systems in the United States to remove pollution and greenhouse gas emissions from the transportation sector as much as is technologically feasible, including through investment in—

(i) zero-emission vehicle and non-motorized alternative modes of transportation infrastructure and manufacturing;

(ii) clean, affordable, and accessible public transit; and

(iii) high-speed rail;

(I) mitigating and managing the long-term adverse health, economic, and other effects of pollution and climate change, including by providing funding for community-defined projects and strategies;

(J) removing greenhouse gases from the atmosphere and reducing pollution by restoring natural ecosystems through proven low-tech solutions that increase soil carbon storage, such as land preservation and afforestation;

(K) restoring and protecting threatened, endangered, and fragile ecosystems through locally appropriate and science-based

projects that enhance biodiversity and support climate resiliency;

(L) cleaning up existing hazardous waste sites and abandoned sites and ensuring economic development and sustainability on those sites;

(M) identifying other emission and pollution sources and creating solutions to remove them; and

(N) promoting the international exchange of technology, expertise, products, funding, and services, with the aim of making the United States the international leader on climate action and to help other countries achieve a Green New Deal;

(3) a Green New Deal must be developed through transparent and inclusive consultation, collaboration, and partnership with frontline and vulnerable communities, labor organizations, worker cooperatives, civil society groups, academia, and businesses; and

(4) to achieve the Green New Deal goals and mobilization, a Green New Deal will require—

(A) providing and leveraging, in a way that ensures that the public receives appropriate ownership stakes and returns on investment, adequate capital (including through community grants, public banks, and other public financing), technical expertise, supporting policies, and other forms of assistance to communities, organizations, Federal, State, and local government agencies, and businesses working on the Green New Deal mobilization;

(B) ensuring that the Federal Government takes into account the complete environmental and social costs and impacts of emissions through—

(i) existing laws;

(ii) new policies and programs; and

(iii) ensuring that frontline and vulnerable communities shall not be adversely affected;

(C) providing resources, training, and high-quality education, including higher education, to all people of the United States, with a focus on frontline and vulnerable communities, so that all people of the United States may be full and equal participants in the Green New Deal mobilization;

(D) making public investments in the research and development of new clean and renewable energy technologies and industries;

(E) directing investments to spur economic development, deepen and diversify industry and business in local and regional economies, and build wealth and community ownership, while prioritizing high-quality job creation and economic, social, and environmental benefits in frontline and vulnerable communities, and deindustrialized communities, that may otherwise struggle with the transition away from greenhouse gas intensive industries;

(F) ensuring the use of democratic and participatory processes that are inclusive of and led by frontline and vulnerable communities and workers to plan, implement, and administer the Green New Deal mobilization at the local level;

(G) ensuring that the Green New Deal mobilization creates high-quality union jobs that pay prevailing wages, hires local workers, offers training and advancement opportunities, and guarantees direct replacement of lost wages, health care, retirement, and other benefits for workers affected by the transition;

(H) guaranteeing a job with a family-sustaining wage, adequate family and medical leave, paid vacations, and retirement security to all people of the United States;

(I) strengthening and protecting the right of all workers to organize, unionize, and collectively bargain free of coercion, intimidation, and harassment;

(J) strengthening and enforcing labor, workplace health and safety, antidiscrimina-

tion, and wage and hour standards across all employers, industries, and sectors;

(K) enacting and enforcing trade rules, procurement standards, and border adjustments with strong labor and environmental protections—

(i) to stop the transfer of jobs and pollution overseas; and

(ii) to grow domestic manufacturing in the United States;

(L) ensuring that public lands, waters, and oceans are protected and that eminent domain is not abused;

(M) obtaining the free, prior, and informed consent of indigenous peoples for all decisions that affect indigenous peoples and their traditional territories, honoring all treaties and agreements with indigenous peoples, and protecting and enforcing the sovereignty and land rights of indigenous peoples;

(N) ensuring a commercial environment where every businessperson is free from unfair competition and domination by domestic or international monopolies; and

(O) providing all people of the United States with—

(i) high-quality health care;

(ii) affordable, safe, and adequate housing;

(iii) economic security; and

(iv) clean water, clean air, healthy and affordable food, and access to nature.

AMENDMENTS SUBMITTED AND PROPOSED

SA 1447. Mr. LANKFORD (for himself, Mr. INHOFE, and Mr. DAINES) submitted an amendment intended to be proposed by him to the bill S. 937, to facilitate the expedited review of COVID-19 hate crimes, and for other purposes; which was ordered to lie on the table.

SA 1448. Mrs. BLACKBURN submitted an amendment intended to be proposed by her to the bill S. 937, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 1447. Mr. LANKFORD (for himself, Mr. INHOFE, and Mr. DAINES) submitted an amendment intended to be proposed by him to the bill S. 937, to facilitate the expedited review of COVID-19 hate crimes, and for other purposes; which was ordered to lie on the table; as follows:

At the end of section 2, add the following:

(C) ABORTIONS BASED ON RACE, ETHNICITY, COLOR, NATIONAL ORIGIN, SEX, OR DISABILITY, INCLUDING A CHROMOSOMAL DISORDER.—

(1) REPORTING.—

(A) IN GENERAL.—For the purposes of facilitating expedited review under subsection (a), the Attorney General shall include any abortion committed against an unborn child based on the race, ethnicity, color, national origin, sex, or disability, including a chromosomal disorder, of the unborn child.

(B) RULE OF CONSTRUCTION.—Nothing in subparagraph (A) shall be construed to create an offense or an additional category of hate crime.

(2) HOLD HARMLESS.—A woman upon whom an abortion is performed based on the race, ethnicity, color, national origin, sex, or disability, including a chromosomal disorder, of the unborn child may not be prosecuted or held civilly liable on that basis under any provision of Federal law.

SA 1448. Mrs. BLACKBURN submitted an amendment intended to be proposed by her to the bill S. 937, to facilitate the expedited review of COVID-
